Wilson County Home Health Agency Pilots New Mobile Data Capture Software System

DURHAM, N.C. (April 11, 2014) — Wilson County Home Health Agency (WCHHA) is piloting a new mobile data capture software system.

"This will empower the nurses to spend less time with paperwork and more time with patients"
Debra Harris, Director

we expect to see a significant reduction in copying forms and a significant increase in an increased acceptance of the system. The system is less secure. Finally, we feel that we will be providing nursing staff better access to patient information with regard to previous notes and visit records. This will empower the nurses to spend less time with paperwork and more time with the patients."

Wilson County Home Health Agency Pilots New Mobile Data Capture Software System

DURHAM, N.C. (April 11, 2014) — Wilson County Home Health Agency (WCHHA) is currently piloting a new mobile data capture software system, Mi-Forms, which will allow its staff to collect patient data on their mobile devices.

"We wanted to save time and money on our data collection process and with Mi-Forms we have"
Debra Harris, Director

we expect to see a significant reduction in the amount of time spent copying forms and a significant increase in the amount of time spent securing patient data in compliance with HIPAA regulations. This is less secure. Finally, we feel that we will be able to give our nursing staff better access to patient information with regard to previous notes and visit records. This will empower the nurses to spend less time with paperwork and more time with the patients."
